

## Check-in Feature at ITS

### Business Objective

- To increase gate fluidity and expedite the ingate process to improve driver experience while allowing un-used appointments to be claimed by another trucker.

### Check-in Concept

- To allow an appointment to be scheduled without requiring the Tractor Plate. The Tractor Plate will need to be added at the time of check-in which is 60 minutes before the start of the appointment time. If the check-in is performed successfully by satisfying the requirement, the appointment will be confirmed. If the check-in is not performed, the appointment will be cancelled.

### Transaction Types

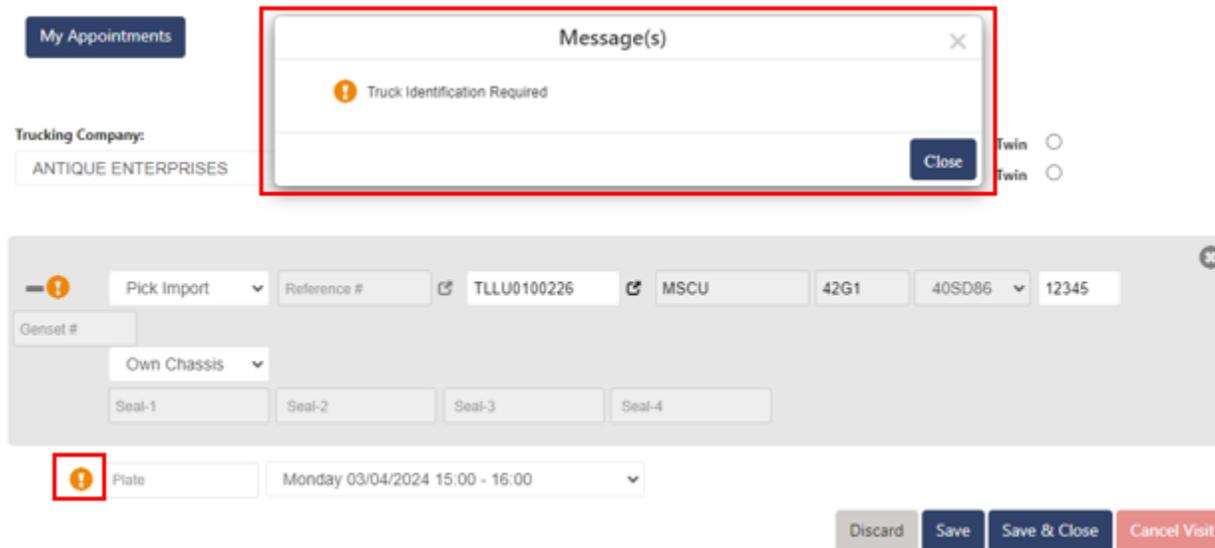

- Check-in will be required for import delivery transactions only. Both single and dual transactions will require check-in. Single empty and export transactions will not require check-in at this time.
- All other transactions will no longer require Tractor Plates at the time of appointment creation. Tractor Plate will be encouraged, but not mandatory.

### **Rules & Requirements**

- Check-in must be performed 60 minutes prior to the start of the appointment time. Example, if the appointment is 0900-1000 – check-in must be performed by 0759. Tractor plate can be edited after if needed.
- If check-in is not performed the appointment will be auto cancelled and will need to be re-scheduled.
- Drivers arriving with a checked-in appointment with incorrect data will be rejected at the gate.
- Drivers arriving with a checked-in appointment with accurate data will be auto processed at the gate and admitted swift entry.

## Appointment Creation

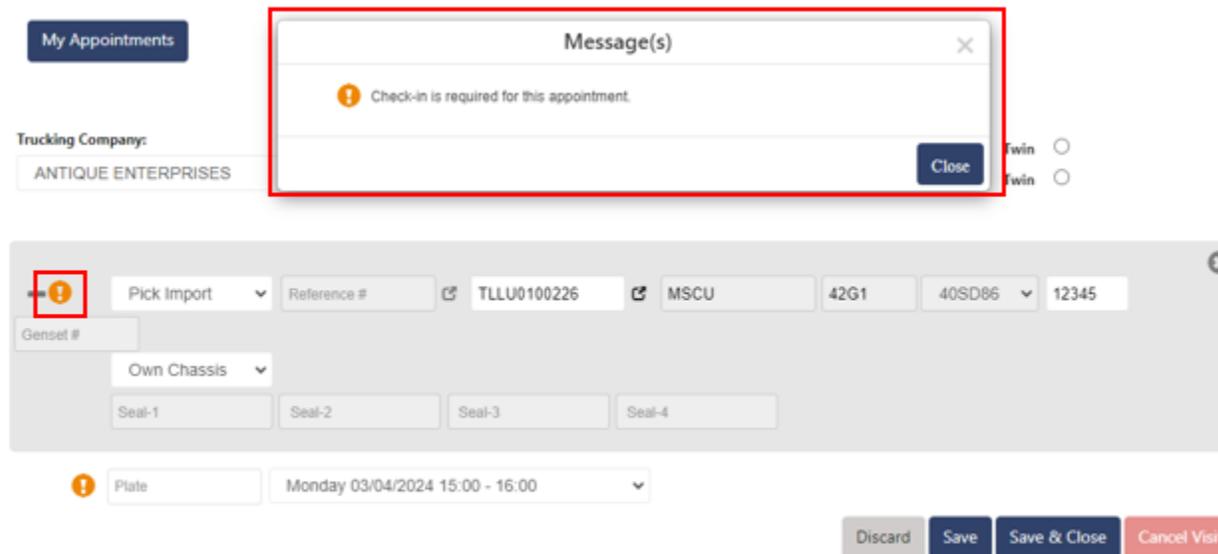

Tractor Plate will no longer be required at the time of appointment creation. User will receive the amber colored warning advising that the Truck identification is required.

The screenshot displays the appointment creation interface. A modal window titled "Message(s)" is open, showing an amber warning icon and the text "Truck Identification Required" with a "Close" button. Below the modal, the "Trucking Company" is set to "ANTIQUE ENTERPRISES". The main form includes fields for "Pick Import", "Reference #", "TLLU0100226", "MSCU", "42G1", "40SD86", and "12345". There are also "Genset #", "Own Chassis", and "Seal-1" through "Seal-4" fields. At the bottom, the "Plate" field is highlighted with a red box and contains an amber warning icon. The date and time are set to "Monday 03/04/2024 15:00 - 16:00". Buttons for "Discard", "Save", "Save & Close", and "Cancel Visit" are at the bottom right.

## Check-in Warning

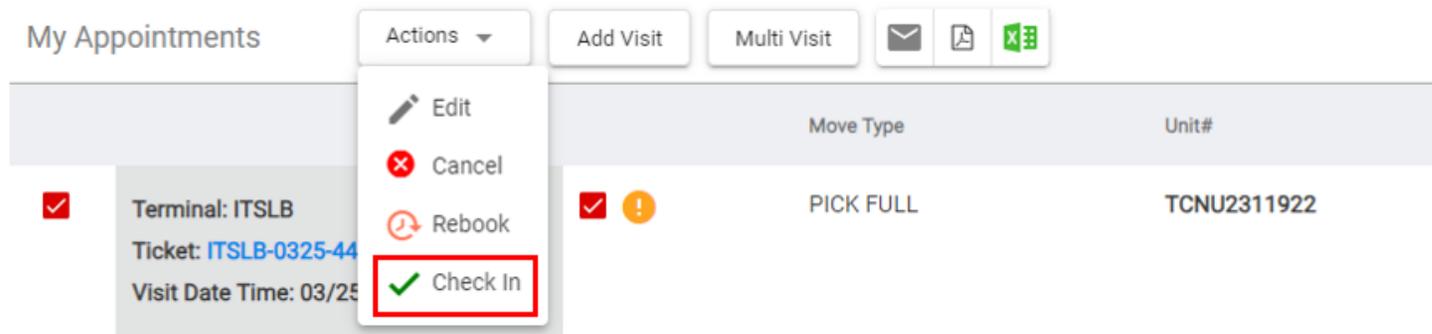

User will receive an amber colored warning advising that Check-in is required for the appointment.

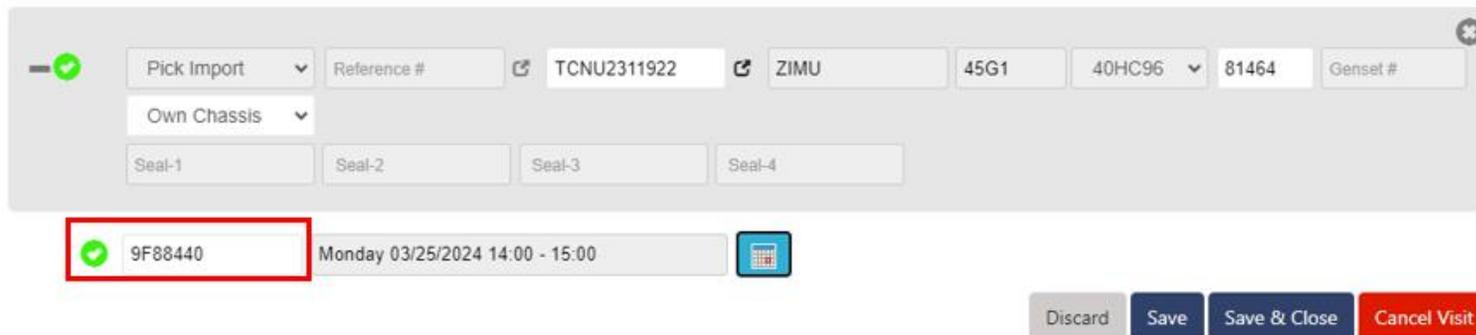

The screenshot displays the eModal interface. At the top left, there is a 'My Appointments' button. Below it, the 'Trucking Company' is set to 'ANTIQUE ENTERPRISES'. A modal window titled 'Message(s)' is open, containing an amber warning icon and the text 'Check-in is required for this appointment.' with a 'Close' button. Below the modal, a form contains various fields: 'Pick Import' (with an amber warning icon), 'Reference #' (TLLU0100226), 'MSCU', '42G1', '40SD86', and '12345'. There are also 'Seal-1' through 'Seal-4' fields and a 'Plate' field with a date and time range 'Monday 03/04/2024 15:00 - 16:00'. At the bottom right, there are buttons for 'Discard', 'Save', 'Save & Close', and 'Cancel Visit'.

### Check-in

From the 'My Appointments' tab, user will select the check-box to the left of the container, select actions and then Check-In.

User will be prompted to the Appointment Creation screen where the License Plate can be added.

The appointment will then be confirmed and checked-in.
